Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 7-10 & 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Wald et al. (# US 6042621).

Wald et al. disclose a method for printing recording material by ink printing (column: 3, line: 5-12) process including the step of printing the recording material with composition including dye of the following formula (I), and water (see Examples; column: 4, line: 1-25). They also disclose that the recording material is textile (column: 2, line: 50-60).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 & 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scheibli et al. (# US 6063137) in view of Wald et al. (# US 6042621).

Scheibli et al. discloses a printing process showing no fading when dye stuff or a dyestuff mixture of a first step and second step are brought in contact on a substrate and having a common overlapping area on the substrate including in first step applying at least one dye formula 3 selected as shown below and second step applying at least one dye stuff, which different from the first steps (see Abstract; column: 1, line: 60-67).

Art Unit: 2853

Scheibli et al. differs from the claim of the present invention is that the dye used in the first step is selected from

Wald et al. teaches that to get the greenish yellow printed image, having excellent light and wet fastness, printing the recording material with composition including dye of the following formula (I), and water (see Examples; column: 4, line: 1-25). They also disclose that the recording material is textile (column: 2, line: 50-60).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the ink composition used in the printing process of Scheibli et al. by the aforementioned teaching of Wald et al. in order to have a printed image with excellent light and wet fastness properties.
